Introduction

eOrganic is the Organic Agriculture Community of eXtension, which is a national online initiative of the Land Grant universities. Our mission is to foster an organic research and outreach community, produce science-, experience-and regulation-based information on certified organic farming, and make the results of organic research projects more widely available.

The following list of articles, videos, webinars, recorded conference presentations, and other publications were created either by members of eOrganic, or were recorded and archived by eOrganic in collaboration with organizers and presenters at organic farming and research conferences. This collection of information resources is a valuable archive of publicly available material on organic farming and research. eOrganic gratefully acknowledges the hundreds of organic researchers, farmers and educators who have written and reviewed articles, created videos, presented webinars, as well as the people and organizations who have cooperated with us to broadcast, record, and preserve conference presentations. We owe a special thanks to USDA NIFA, SARE, and the many researchers across the U.S. who have collaborated with eOrganic on grants. We also thank the many attendees to our webinars, who challenged us with questions which have informed the creation of additional resources. This list truly represents a community effort.

This list is organized by resource format, and then alphabetically. To search eOrganic resources by topic, visit our website at http://www.eXtension.org/organic_production. If you have expertise in organic farming and research and would like to contribute an article, please join <http://eOrganic.info>.
